Automatic insertion of customers' information

Entering fiscal data for invoice

Customer loyalty program freebee

Invoice printing (Bluetooth or other printer)

Sending documents to the TA

Payments available with virtual wallets (MB Way, MEO Wallet, SEQR)

Manage your kitchen with a single look. The ZS monitor is the application that allows you to have complete control over kitchen orders and keep the focus on what really matters: delivering your customers' order in time with high-quality standards.

WHAT ARE THE ULTIMATE BENEFITS OF WORKING WITH ZS MONITOR?

- Improves your stock management, by allowing indication of out-of-stock items directly at the point of sale
- Contributes to the reduction of human errors
- Provides ideal conditions for better space organization and kitchen tasks
- Allows you to reduce and avoid the use of paper in your operation
- Enables impeccable cleaning at the kitchen

HOW DOES IT MAKE IT ALL POSSIBLE?

- It shows all the orders' estimated preparation time by color and comments (rare, well done...)
- All order status' changes and new orders are followed by a beep
- Allows the transfer of orders between production centers
- Enables grouping quantities of the same product
- Take-away mode with customer screen and delivery confirmation screen for the staff
- It connects to printers
